

Sugar Twin Sucralose

Sugar Twin Sucralose is the closest thing you can get to sugar, without the calories. Sucralose is derived from sucrose (sugar) which is sourced from the finest sugar plantations from around the world and then put through an in-depth purification process to produce an amazing sweetener. Not only does Sucralose have zero calories, but it does not promote dental cavities, is safe for consumption by diabetics and does not affect insulin levels. Since its introduction in Canada in 1991, Sucralose is now found in over 4,500 food and beverage products.
