Single estate naturally sourced spring water
drawn from the heart of Great Britain's finest Springs.
Available in Still & Sparkling

DISCOVER THE GEOLOGY

ETONRIDGE®

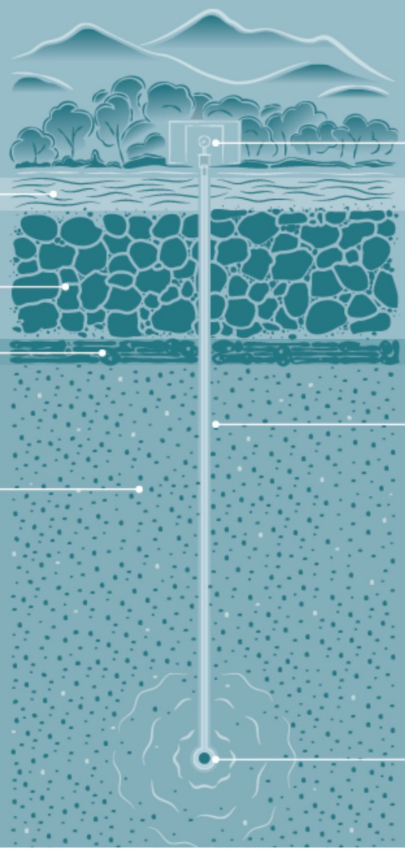

1. RAIN FALLS
The first stage in the Etonridge process is when the rain falls and hits the Welsh soil, starting on its 100 year journey through the earth and rock to its final destination in your glass.

2. LAYER OF SOIL
Soil and small stones are the second stage on our waters journey. This is the first stage of the filtering process.

3. BOULDER LAYER
The second filtering stage is when our water meets the deeper layer of large boulders, leftover from the time of the planets ice age, when glaciers covered the Welsh land.

4. LAYER OF CLAY
After the boulders comes a thin layer of clay which filters out most of the waters fine impurities.

5. SOLID MUD ROCK
The final filtering stage is when our water travels through a deep, deep layer of solid mud rock. It is this layer that gives Etonridge its unique qualities of taste and purity.

6.WATER PUMP
Finally when our water is ready it reaches our bore hole, 80 meters below the surface. At this point it is captured by a powerful pump.

7. BORE HOLE
Our bore hole is a precision piece of engineering that propels our water, under pressure, straight up to our purpose built outlet house.

8. WATER OUTLET
It is from here that all Etonridge water comes from. This is situated close to our bottling plant, ensuring ultimate freshness, and minimum environmental impact.

Item Code	Item Name	Pk/Size	UPC	SCC	Case (L x W x H)	Case Weight Net & Gross		Tie/High
50801	Etonridge Sparkling Spring Water	24 x 330 ml	800463508019	10800463508016	39.20 x 24.21 x 19.20 cm 13.25 x 9.53 x 7.56”	13.248 kg 29.21 lb	13.478 kg 29.71 lb	10 x 8 = 80 cases per pallet
